

# It's time to bring your team together.

Powerful chat & integrations combined with voice, video, and screensharing.

This is an instance.

### Interactive chat

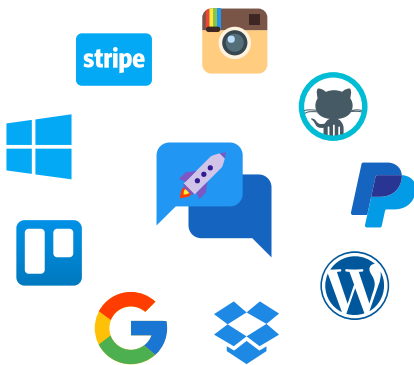

Chat with unlimited people in each instance. Support for markdown, mentions, emoji's, media previews, code highlighting, unlimited message history, and more.

### Group voice and video

Collaborate in HD voice and video with up to 6 people. No need to call. Just click the headset and join the conversation.

### Multi-user screenshare

"What would you do with a million dollars?" Two screens at the same time, man. Collaboration is easy when you can forget about taking turns or assigning a presenter.

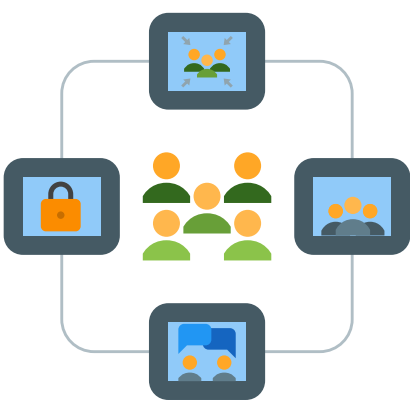

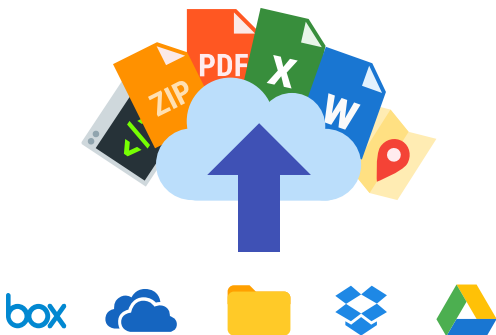

### Power up an instance with your favorite services.

Enjoy unlimited integrations with your favorite tools and services. Receive notifications directly to your chat from services like GitHub, Trello, Desk.com, Salesforce, and more. Power-ups are completely customizable for each instance to allow you to keep everyone and everything up to speed.

### Share files and so much more.

Upload files up to 20MB in size directly into an instance or paste a link from your favorite service. Can't talk but have something to say? Upload a short video clip directly from the app. Instances lets you interact with shared files and links from services you love like GitHub, jsFiddle, Codepen, Google Maps, and more.

### Create a team to manage people and instances.

Set up your team to allow people to move fluidly throughout conversations. With Instances, you're not locked into a single team. Create one for your company, project, or organization and manage the members and instances that are a part of it.

### Available virtually anywhere.

Stay connected wherever you go with native apps for Android, iOS, and WM10. Desktop apps are available for Windows, Linux, and Mac OSX. The powerful web portal is fully mobile responsive and full featured on most modern smartphones.

### So what's next?

Well, we're currently in a closed preview beta working to finish and expand upon all these awesome features.
