

The Datalogics-Adobe Relationship

Datalogics and Adobe have been working together for over 20 years. Once a wholly-owned subsidiary, we are still partially owned by Adobe and in this capacity serve as their channel for several of their PDF and eBook technologies. This unique relationship enables us to deliver an unbeatable combination of high-quality Adobe technology and personalized, responsive support that have been our hallmark since 1967.

Datalogics provides Adobe PDF developer technologies and eBook technologies to software developers. These toolkits are compatible with the latest Adobe products and conform to the latest industry specifications. They are updated with every Adobe release, ensuring compatibility as products and standards evolve.

Authors, designers, and editors can license industry-standard Adobe technologies, enabling you to focus on the rest of your product while using industry standard Adobe software to create eBook content.

We know that reliable support is important to you, and it is to us as well. Our experienced Support Engineers can answer your questions and help solve your

problems quickly and accurately. They've been working with these products for many years and understand how to effectively support software developers.

Today we support over 600 companies worldwide who have brought products and applications to market, all built using Adobe developer toolkits from Datalogics. These products utilize a wide variety of features and functionality. Once you're a customer you'll always want to be a customer.

Contact us to learn more about the industry-standard Adobe technologies and toolkits. Learn why hundreds of customers have licensed from us, and experience firsthand what real customer support is about.

Our customers include:

- Barnes & Noble
- L'Oréal
- GMC Software
- Nemetschek
- IBM
- Kobo
- University of Toronto Press
- Oracle

Here's what our customers say:

"Datalogics has provided superb help with very short turnaround time that enables us to resolve problems in our products accurately and quickly."

"I love using the Adobe PDF Library - we were using a mish-mash of other tools and this API makes our product so much better."

"I really enjoy working with the team and appreciate the extra effort that goes into the quick answers to engineering questions."
