**Telerik** Platform

THE COMPLETE MOBILE APP DEVELOPMENT PLATFORM

At a Glance

Telerik Platform is the only modular platform that combines a rich set of UI tools with powerful cloud services to develop mobile apps.

Telerik Platform enables developers to build, connect, test, deploy and analyze cross-platform mobile apps using any development approach (web, hybrid or native).

UI for any approach

cloud services

for any platform

Key Benefits

Optimize the Mobile Customer Experience:
Unlock the rich UI capabilities of the Telerik Platform to build web, hybrid and native apps.

Increase Developer Productivity:
Leverage market-proven productivity features to boost developer productivity. The intuitive, code-oriented interface of the Telerik Platform is built with developers in mind.

Boost Innovation With Peer Collaboration Features:
Collaboration breeds innovation. The unmatched collaboration capabilities of Telerik Platform will ensure teams deliver great results.

Scale With Unified Cloud Infrastructure:
Ensure performance and scalability. Build cloud-connected apps with adaptive cloud services and integrated UI libraries.

Extend Easily With Modular, Open Architecture:
Standardizing on a development platform is a big commitment. That's why we enable you to start with a single module and grow as your needs change.

Transform Your Enterprise:
Your employees want to access data anywhere, anytime. Telerik simplifies enterprise app delivery with easy integration with your backend data and infrastructure.

UI libraries to create apps using any approach:

UI for Web Apps
Kendo UI Web,
Kendo UI DataWiz,
UI for PHP, UI for JSP

**UI for Hybrid Apps**
Kendo UI Mobile,
UI for PhoneGap

UI for Native Apps
UI for iOS, Android,
Windows Phone and
Windows 8

4.
5.
Design
Deploy

AppBuilder
Build mobile apps using only JavaScript, HTML and CSS

AppManager
Securely deploy and manage public and private apps

AppPrototyper
Create interactive UI prototypes with an intuitive drag-and-drop interface

Mobile Testing
Test your apps across all devices and browsers

AppBuilder IDE choices

In-Browser Client
Develop cross-platform mobile apps on the go with a web client that runs in all modern browsers.

Windows Client
This native Windows application provides code navigation, refactoring and real-time on-device updates.

Visual Studio Extension
Enjoy all of the AppBuilder platform's cross-platform capabilities without leaving Visual Studio.

Sublime Text Package
Add a set of commands to build, deploy and LiveSync changes from Sublime Text to your connected devices.

Command-Line Interface
Access the build, deploy and simulator capabilities of AppBuilder from the command line, on Windows or OS X.

Industry-Leading Support

Telerik tools are backed by our legendary support, even during trials. Our dedicated support team is with you every step of the way, so your project can run on time and under budget. No matter how big or small your project, just reach out and we'll be there for you.
